Department of Botany

Report on

Celebration of National Science Day, 2025

Organized By- Department of Botany

Date: 28.02.2025 Time: 09:00 am to 09:30 am

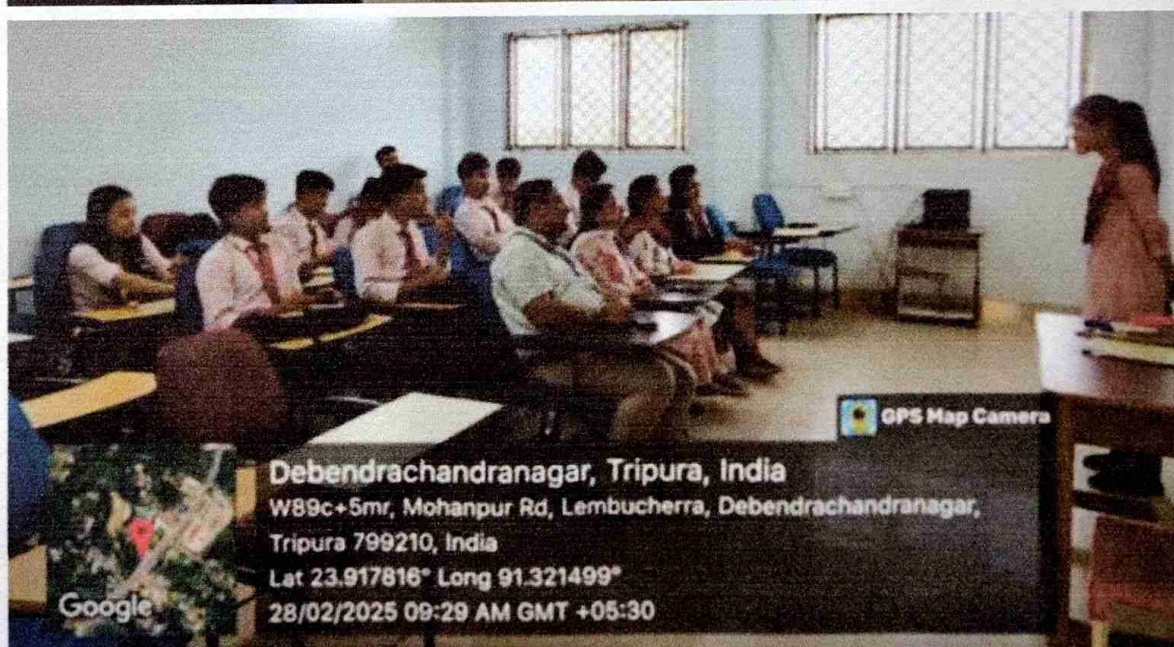

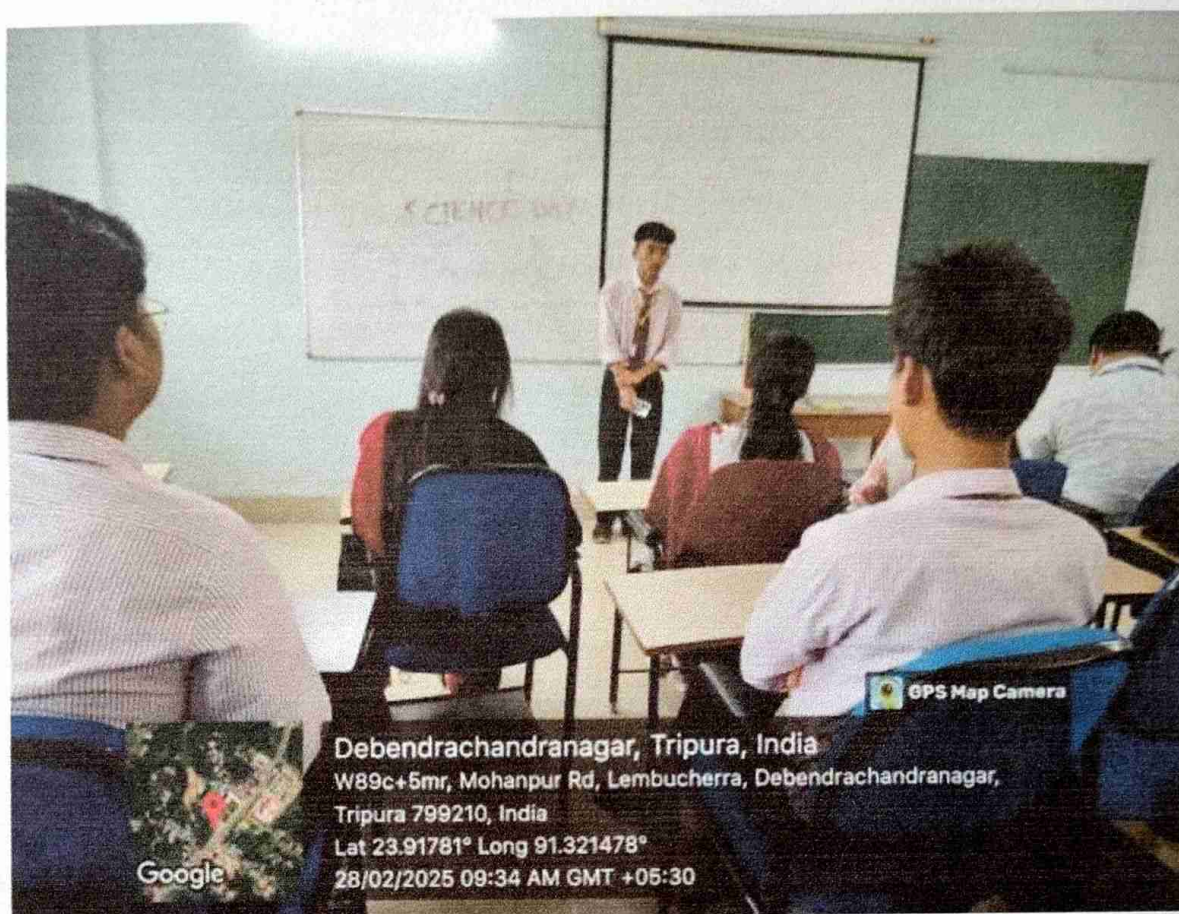

The Department of Botany, Holy Cross College, Agartala, observed National Science Day on 28th February, 2025, with a brief academic session organized within the department. Few students (24 students from Botany Department) took the initiative. The celebration was conducted with the participation of a students, who highlighted the importance of the day and reflected upon the invaluable contributions of renowned Indian botanists to the field of science. The presentations were delivered in the presence of the faculty members and students of the department.

During the session, the students spoke about the revolutionary works of renowned personalities such as Dr. Birbal Sahni, the father of Indian paleobotany; Janaki Ammal, known for her significant contributions to plant cytogenetics and biodiversity conservation; and M.S. Swaminathan, the architect of the Green Revolution in India. Through their presentations, students explored how the dedication and innovative work of such renowned scientists have left a lasting impact on scientific and agricultural development in India.

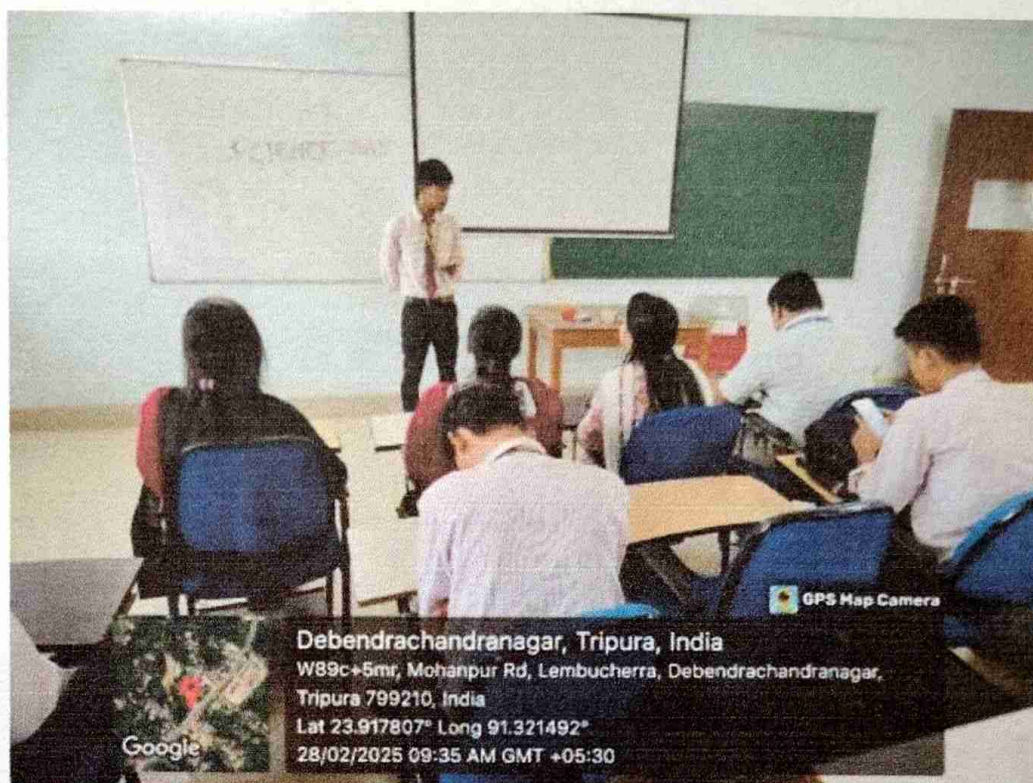

Though the event was kept simple, it successfully created a meaningful opportunity for students to recognize and reflect upon the extraordinary contributions of Indian botanists. This exercise not only deepened their appreciation of botanical science but also highlighted how these historical achievements continue to influence modern research and practices.

Looking ahead, the Department of Botany is keen to expand such events in the future. We aim to encourage even wider student participation and engagement. By doing so, we hope to foster a deeper and more practical understanding of how science, particularly botanical science, touches and improves everyday life.

The goal of the celebration was to inspire students to see themselves as active contributors to a scientific legacy that benefits both people and the planet.
